October 26<sup>th</sup> 2015

**MSH INTERNATIONAL is pleased to announce a new partnership with Canada's leader in preventive healthcare, Medisys Corporate Health.**

Medisys has over 26 years of experience delivering excellence to the corporate health market and they are the only national provider with clinics across Canada, including Vancouver, Calgary, Toronto, Ottawa, Montreal and Quebec City.

Accessing top quality medical care at preferred prices has never been so convenient! With globalization, business travel is on the rise, increasingly to far-flung locations. The experts at Medisys can deliver comprehensive services to keep employees healthy and productive while they're on the road.

Medisys' comprehensive medical and pre-expatriation exams are everything expatriate employees need for their preventive health. What is more, MSH INTERNATIONAL has made arrangements to pay directly on our members' behalf – there is no need for the employee to pay up front and then be reimbursed.

What your employees can expect

The Medisys approach is to plan, educate and protect, and that's what your employees can expect. Their travel health experts will gather details on travel and their current health status. They will provide all vaccinations on-site, including routine and travel-related vaccines. They will also receive medical guidance specific to their travel plans and tips on staying healthy while travelling abroad.

**Through this partnership, we can offer direct billing services for all preventive check-ups before the expatriation date.**

For more information about Medisys clinics across Canada, go on our members' area online and use the "Find a Facility" tool (members' access only). In addition, you can contact our client team at 1-888-842-1530 or by emailing [adminamerica@msh-intl.com](mailto:adminamerica@msh-intl.com).

Sincerely,

**MSH INTERNATIONAL (CANADA) LTD.**
